

169.

similar to find most appear numbers,
so we can go through array,
if same number appear, then count it 1 time,
or add one, if did not appear, then set count-
if count equal 0, which mean not most one appear,

[2, 2, 1, 1, 1, 2, 2] set major = nums[i] or 2
1 2 1 2 3 3 4 count = 0

2:4 ← major

1:3

we can also use hash map
